

## **CartoPac International Brings Full Support for Enterprise Solutions to Esri Users Exclusive US-Distributorship for WebOffice Signed**

*CartoPac and SynerGIS integrate products to support spatially enabled enterprise workflows from the field to enterprise GIS*

Fort Collins, CO, Oct. 19, 2011 /PRNewswire/ -- Full support for spatially enabled enterprise workflows, from data capture in the field to the management dashboard on the company's intra-web, is the result of a strategic cooperation between CartoPac and SynerGIS. In addition, CartoPac will be the exclusive distributor for SynerGIS WebOffice, a powerful productivity framework on top of ArcGIS for Server, for the Americas.

"The need to innovate and improve the efficiency and productivity of managing critical field assets across the enterprise is an outstanding opportunity to add value between mobile and enterprise GIS for any company," said Ken Schrader, President of CartoPac International, Inc. "Field collected data can now be easily accessed, visualized and analyzed by all stakeholders throughout the company via a highly productive web platform – any place, any time."

Peter Remesch, CEO of SynerGIS, about this partnership: "Our flagship product, WebOffice, needed a strong U.S. partner with vision, expertise and a solid market position in order for us to grow our business in the U.S. With CartoPac, we have found this strong partner – who at the same time has a competitive product portfolio. This is a perfect match. Customers will benefit from our joint portfolio, expertise and future developments."

The combined solution from CartoPac and SynerGIS will be introduced and demonstrated at the GITA Oil and Gas Conference in Houston on October 24-26.
